Copper Alloy Bolted Lugs Bronze Copper Bolted Lugs and Electrical Cable Connectors

Copper Bolted Lugs and bronze Copper Alloy Bolted Lugs are a best way of making a connection on a normal or flexible conductor.

A quick and easy way to make temporary connections, they can be used many times.

Copper Alloy Bolted Lug Features

- Palms are machined top and bottom for bolting on either surface
- High Quality machined Brass hex nuts from CDA 360 alloy
- Manufactured from high conductivity copper alloy -LG2 or Aluminium bronze cast and machined
- Copper alloy bolted lug Barrels have internal corrugations in the clamp to assist current transfer

To install, simply insert the stripped conductor into the barrel, and tighten up the single hex nut.

Technical Data

Conductive Material: Copper alloy Bronze LG2	Operating Temperature: -54°C to 100°C
Accepting Authorities: Leading Australian customers	

Line drawings and recommended tooling details are available.
